

Everyday tech, explained.

Three free guides. Short narrated videos. Clear written steps.

Learn at your own pace

Read or watch online. No account or purchase required. Share this sheet with someone who would appreciate patient technology guidance.

01 Restart versus reset

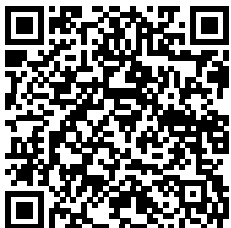

Understand the difference before choosing recovery. Save your work before restarting; back up important files before considering a reset.

02 Check a suspicious email

Pause before clicking. Learn how to check a message and verify a request through a separate, trusted contact method.

03 Safer software updates

Use official update tools and prepare your device before installing updates. Follow the guide step by step.
